ABOUT US

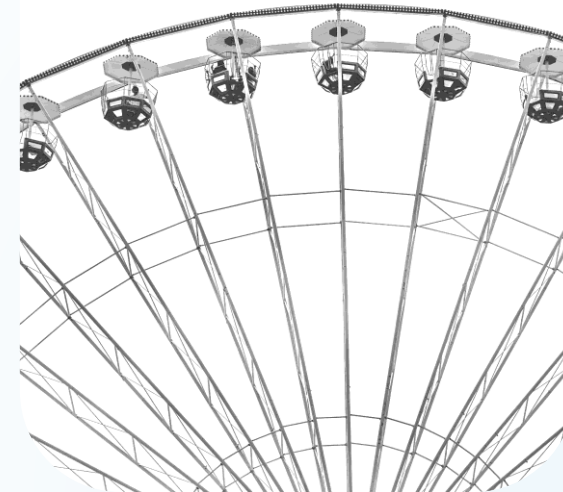

Lyrex Labs is a lean tech studio delivering high-quality software at an affordable cost. Powered by a talented university team, we've built 15+ projects spanning websites, web apps, and custom software. We focus on clean design, reliable code, and mobile-ready solutions that help businesses grow. One team, end to end, committed to building digital products that are modern, cost-effective, and built to last.

VISION STATEMENT

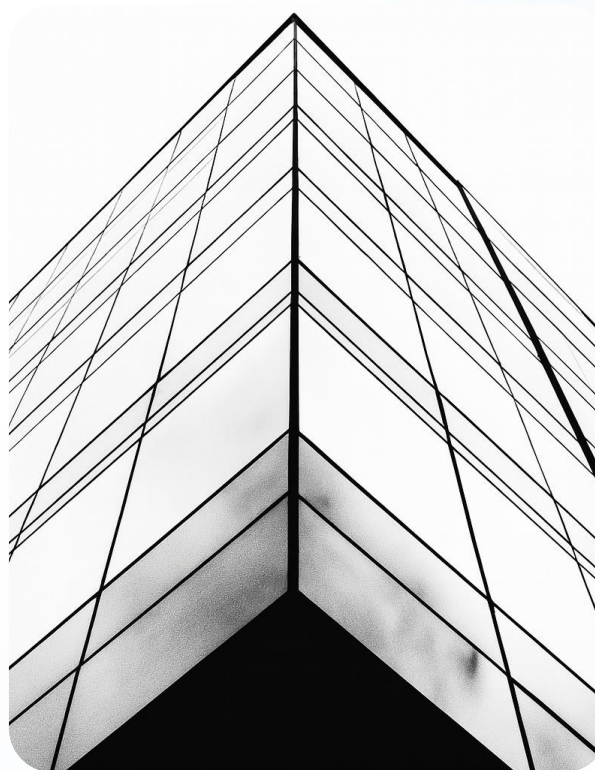

WHERE LYREX LABS IS HEADED

Build affordable, high-quality digital solutions that empower businesses to grow, innovate, and succeed.

Lyrex Labs 2025

MISSION STATEMENT

WHAT DRIVES LYREX LABS EVERY DAY

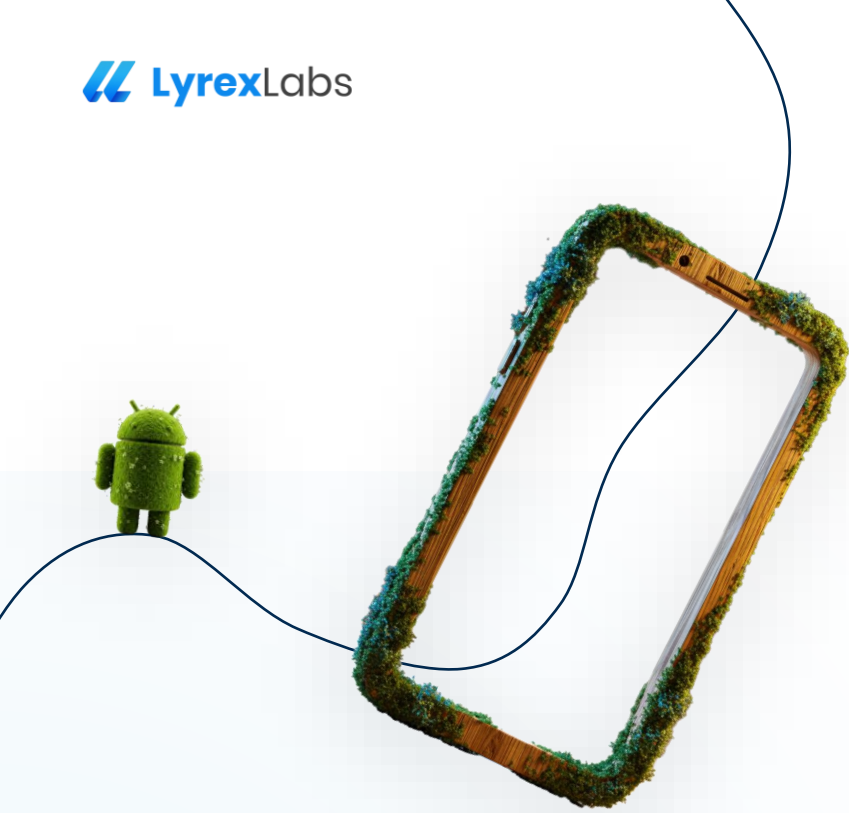

Deliver modern, cost-effective websites and software through a passionate university team, completing 15+ projects with a focus on clean design, reliability, and impact.

SERVICES OVERVIEW

WHAT DRIVES THE COMPANY

From rapid POCs to production-grade platforms, we design and build mobile/web apps, craft UI/UX, run DevOps and cloud infrastructure, and lock in quality with rigorous QA—one team, end to end.

- 02** WEB APPLICATION DEVELOPMENT →
- 03** UI/UX DESIGN →
- 04** AI & WORKFLOW AUTOMATION →
- 05** DevOps & CLOUD SERVICES →
- 06** POC DEVELOPMENT (PROOF OF CONCEPT) →

MOBILE APPLICATION DEVELOPMENT

We design and build native and cross-platform mobile apps that scale seamlessly
- combining smooth performance, intuitive UI, automated testing, and maintainable architecture. From consumer-facing apps to enterprise solutions, we deliver mobile products that engage users and grow with your business.

02 WEB APPLICATION DEVELOPMENT

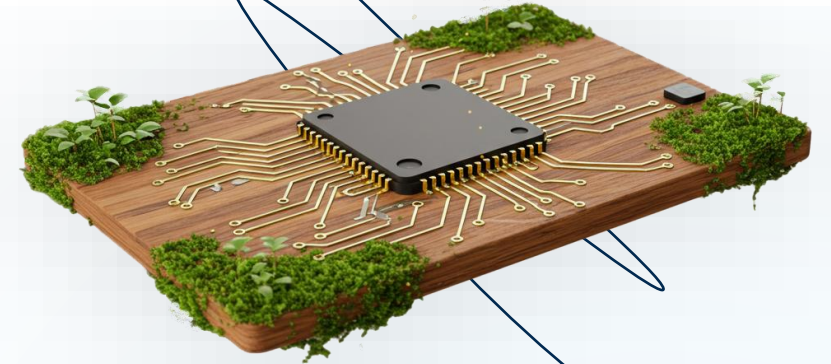

From e-commerce platforms and personal portfolios to complex web applications, we create solutions that are secure, scalable, and visually appealing - using modern frameworks, responsive design, and optimized performance to ensure your web presence drives results.

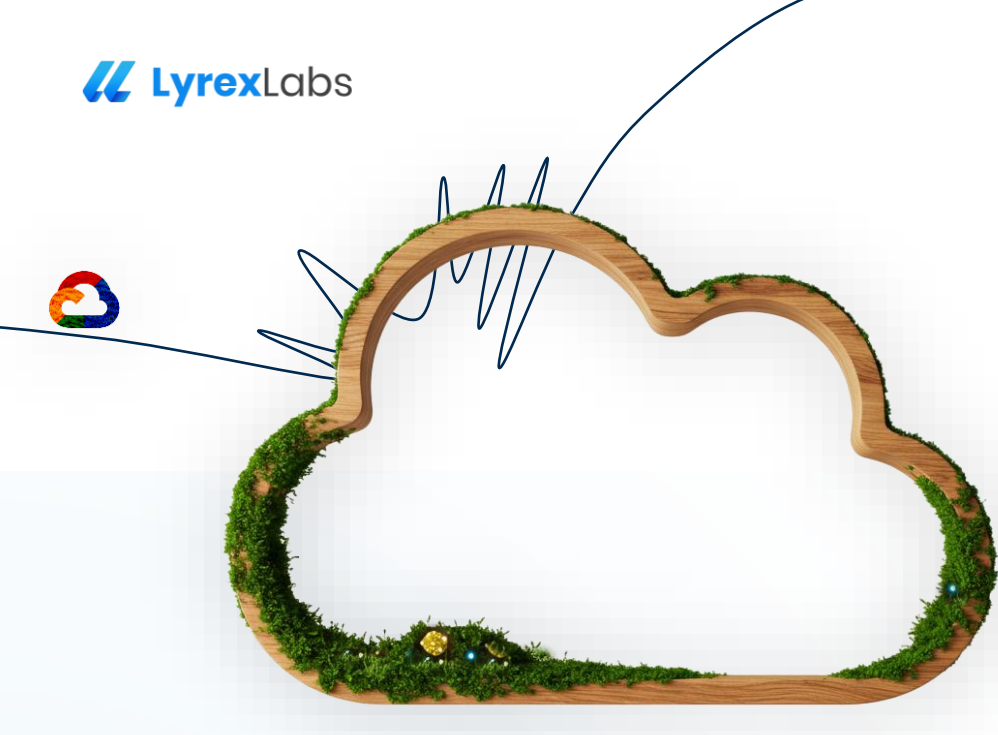

03 USER INTERFACE & USER EXPERIENCE DESIGN

We craft intuitive, modern interfaces and seamless experiences that delight users - applying user research, interaction design, and consistent branding to ensure every product is easy to use, visually coherent, and highly engaging across devices.

04 AI & WORKFLOW AUTOMATION

We implement AI-driven tools and automated workflows that streamline processes, improve efficiency, and enhance decision-making - developing AI agents to manage and add data, integrating with existing systems, analyzing information intelligently, and scaling solutions to match business needs.

05 DevOps & CLOUD SERVICES

We architect, deploy, and run cloud-native infrastructure that scales on demand - using IaC (Terraform/CDK), containers or serverless, automated CI/CD, and rock-solid observability. From migrations and multi-cloud setups to security hardening and cost optimization, we keep your stack fast, resilient, and budget-smart.

06 PROOF OF CONCEPT DEVELOPMENT

We quickly turn ideas into functional prototypes that validate concepts early - testing features, performance, and market fit using rapid iterations, realistic simulations, and practical feedback to guide full-scale development confidently.
